CentroPelet ZVBS

POWER OF HEAT WITH MAXIMUM EFFICIENCY

CentroPelet ZVBS hot water boilers are a modern solution for ecological and economical heating. Powered by wood pellets, they are ideal for heating spaces ranging from the smallest rooms to medium-sized buildings.Constructed from durable steel and designed with a contemporary look, these boilers deliver high efficiency and long-lasting reliability. Each unit features a burner with automatic ignition and a digital boiler control system for optimal pellet combustion and easy operation. The flue gas fan adjusts according to flue and water temperatures, ensuring maximum energy utilization.The integrated pellet hopper provides convenience and saves space.

CentroPelet ZVBS		25	35
Heating Output	(kW)	5,21-21,51	6,34 - 29,14
Pellet Consumption	(kg/h)	1,2 - 4,85	1,43 - 6,48
Efficiency	(%)	90,39 - 88,82	91,64 - 90,65
Flue Pipe Diameter	(ø mm)	80	100
Air Supply Pipe Diameter P	(ø mm)	50	60
Pellet Capacity	(kg)	70	95
Water Capacity	(l)	50	60
Autonomy	(h)	54 - 13,5	38,5 - 12,5
Power	(V/Hz)	230/50	230/50
Consumption at Nominal Output	(W)	100 - 300	100 - 300
Dimensions (Width/Depth/Height)	(mm)	624x757x1249	688x831x1599
Weight	(kg)	250	305
